

Offering End-to-End UX & UI Design Support

I am pleased to offer comprehensive end-to-end experience design support that helps improve product usability, clarity, and overall performance.

Services	Process	Business Benefits
UX Audit	Assesses the current product state to identify gaps and opportunities.	Helps reveal hidden usability issues early, reducing redesign costs.
Strategic Proposal	Structured proposal covering scope, timelines, priorities, and expected outcomes.	Provides clarity and alignment before starting the project.
Deep Analysis	Detailed study of user behavior, business goals, and market expectations.	Ensures design decisions are data-driven and business-focused.
Information Architecture & Usability Enhancement	Defines clear structure, reduces cognitive load, and optimizes navigation/workflows.	Results in simpler, intuitive interactions that increase user efficiency and satisfaction.
Wireframes, Prototypes & Design System Creation	Includes low/high-fidelity wireframes, interactive prototypes, UI components, and scalable design systems.	Speeds up development, reduces rework, and ensures design consistency across the product.
Development Handover & Ongoing Support	Provides detailed specifications, assets, components, and continuous collaboration with developers.	Ensures smooth implementation and accurate translation of design into final product.
Usability Testing & Iterative Improvements	Continuous validation and refinement based on user feedback and business needs.	Improves product performance, reduces user friction, and increases adoption.

All essential UX and UI capabilities: Research, Analysis, Visual design, User psychology, Usability testing are offered through a single, skilled resource. This eliminates the need to hire multiple specialists for small or mid-sized projects, resulting in faster delivery, reduced cost, and higher-quality outcomes.

Thank you for considering me. I look forward to the opportunity to collaborate.

Warm regards,

Murukan Gopinathan
